Products

DISTIL BI

DistilBI provides a web-driven interface to build and publish interactive reports from data sources. Going beyond that, DistilBI aims to provide consolidated analysis from all the key data components of an intelligent application, including:

- OLAP data sources
- Relational databases
- Statistical data models

We help clients by providing key solutions which in turn can maximize their profitability and optimize performance.

We succeed by making Our Clients/Business Partner succeed.

Our key goal is to take away the complexity of creating and publishing reports for business users. DistilBI does this by providing a clean, intuitive interface to connect to different types of data sources, and to publish web-based interactive reports.

eDriving Test

Computer simulated license test .This is for South African driving school students who are ready to take up driving license test.

iBoard

Display the video, PPT, Image or ticker through multiple screens with same or different information on each screen.

Kpms - Kurinchysoft Practice Management System
